

Cloud PBX for Entrepreneurs

2015-12-09

Despite the exponential cost involved, companies and entrepreneurs have traditionally bought, built and maintained their own communications infrastructure. These days, [Communications as a Service \(CaaS\)](#) and [cloud PBX](#) provides companies with a reliable and cost effective alternative. Small to medium enterprises, large companies, and entrepreneurs can all **benefit from cloud PBX** solutions.

What We Love About CaaS and Cloud PBX

Communications as a Service, and more specifically cloud PBX, is similar to plugging an appliance into a power socket. The service is available as and when it is needed, allowing users to **plug in and subscribe** to voice, data, and messaging services which are built on shared infrastructure.

How Will Cloud PBX Affect My Business?

While access to PBX technology adds immense value to SMEs, historically it has been prohibitively expensive. The problem is that growing a business hinges the ability to communicate. Without **telephony and connectivity you are simply out of the game** and you're not among the 95% - 99% of dominant businesses.

Successful Entrepreneurs

In order to survive in a tough economic climate, successful entrepreneurs need to be more than dedicated. In fact; an entire range of **attributes and skills are required to ensure success**. Passion, perseverance, insight, vision, flexibility and the ability to break the rules are just a few of the characteristic the most successful entrepreneurs possess.

Values And Characteristics

While success is dependent on marrying your value system with the characteristics of other successful entrepreneurs, it is also crucial **to deal with other companies which share these values** and characteristics. Saicom is one such company, who better to provide your phone system than one which mirrors these qualities? **With Saicom's cloud PBX system you'll have features and functionality at your fingertips that will take your business to the next level.**

The Benefits Of Saicom's Cloud PBX

Today simple plug and play subscription services, such as cloud PBX from Saicom Voice Services, are available and there are **so many advantages** to using this/our?/Saicom's technology:

- **Passion and perseverance** - we are committed to giving you an enterprise-grade solution with all the bells and whistles.
- **Flexibility** - scale up and down as your business grows and expands.
- **Vision** - have the latest world-leading telephony technology at a fraction of the price.
- **Break the rules attitude** - no setup fees, with a month-to-month contract and unlimited calls.
- **Insight** - tailor our system to meet your business needs.

Ultimately, your PBX connects you with your clients, colleagues and even the competition. Implementing a cloud PBX solution will make this function more efficient, flexible, and cost effective. What's more; Saicom is amongst the **leading business telecommunication providers in South Africa**, who better to partner with? If you have any questions, feel free to [contact us](#).
